Acknowledgments

We would like to acknowledge all the individuals who have contributed to production of this issue of selected papers from the 18th Biennial World Conference on Gifted and Talented Children, 2009.

Thanks are expressed to the authors of each chapter, whose vision, research, and practical work have presented and underscored the reasons why and the means by which we must invest in our gifted and talented children and youth and tap the human capital for the betterment of society.

This book was produced and edited at and through The World Council Headquarters, and we want to thank The University of Winnipeg, as the host of the WCGTC, for the infrastructure support that it has provided.

Many thanks also go to Stephen Klassen for his generous technical direction in the formatting and for assuming responsibility for the layout and design work and the production of the final proof. We are grateful for his altruistic commitment to this project and seeing the volume to its conclusion in his classic, exemplary fashion.

We also gratefully acknowledge the assistance of Natasha Kleinsasser and Sarah Dietrich, whose participation in the production process helped to expedite the project.

In addition, appreciation goes to Polar Bear Productions, Ltd. for creating the artwork for the book cover.

We also express our thanks to the official publisher of the volume and the host of the conference from which these papers emerged, namely, The World Council for Gifted and Talented Children.

Finally, a great debt of gratitude goes to our families, particularly Stephen and Dimos, who have supported us patiently and encouragingly, as our undertaking took us not only across the University campus and cafes at any hour, but also electronically, across the Canadian shield and the great Atlantic, day or night, at last, to complete this project.

It has been our great pleasure to have worked together, as coeditors, once again, and to play a vital role, in this enduring manner, to carry out the mission of the WCGTC.

INTRODUCTION: Vision and Provision for Gifted Learners	xi
Cathrine Froese Klassen and Eleoussa Polyzoi	

PROLOGUE

The Empire Strikes Back: Redefining the Role of Gifted Education in the 21st Century	1
Joseph S. Renzulli	

PART 1 – DIVERSE POPULATIONS

1. Meeting the Socio-Emotional Needs of Talented ADHD Students	11
Ken W. McCluskey and Andrea McCluskey	
2. They tell me I'm smart, so why do I have so much difficulty with 'laerning'?	19
Charlene Barva	
3. Gifted Immigrants and Refugees: The Gold Unmined	29
Carole Ruth Harris, Zenita Cunha Guenther, and Gillian Eriksson	

PART 2 – ENRICHMENT APPROACHES

1. Teachers' Attitudes and Gifted Students' Socio-Emotional Competencies	41
June Slee	
2. Keys to Creativity Through the Music Heartland Project	49
Errol Moore	
3. Extra-Curricular Science Labs for Gifted Education	59
Dieter Hausamann	
4. The Mexican PAUTA Project: Supporting Talented Students in Science and Mathematics in Morelos, Mexico – A Pilot Study	69
Janet Paul de Verjovsky, Leobardo Serrano-Carreón, Julia Tagüeña, Anne Marie Pierre Alberro, Yoloxochitl Sánchez-Guevara, Gabriel Chavira, and Miriam Martínez Armenta	

PART 3 – ASSESSMENT CONSIDERATIONS

1. Identification of Mathematically Promising Students in a Diverse Society: A Question of Equity	81
Dorit Neria and Miriam Amit	
2. Shaping the Minds of our Youth: The High Performing Student Program at ACS Athens	87
Eleoussa Polyzoi, Cathrine Froese Klassen, Jeff Babb, Stephanos Gialamas, and Christiana Perakis Evloyias	
3. Frühstudium – Acceleration and Enrichment for Secondary-School Students at the University of Koblenz-Landau	101
Martina Endepohls-Ulpe	
4. Identification of Gifted Children Using Nonverbal Ability Tests Across Cultures and Languages	111
Jack A. Naglieri	

Contributors

Anne Marie Pierre Alberro (M.Sc.) completed her graduate studies at the National Autonomous University of Mexico (UNAM) in 1991. Since then, she has taught mathematics at the middle-school, high-school, and undergraduate levels. Currently, she is a member of the organizing committee of the Mexican Mathematical Olympiad. She compiles and edits *Mathematical Calendars*, featuring a puzzle a day, that have been published in Mexico since 2002.

Miriam Amit (Ph.D.) is currently a Dean at Ben-Gurion University, after having been the Director of the University Center and Chairperson of the Department for Science Education. For more than 10 years, she has served as the National Superintendent of Mathematics, overseeing school curriculum, national testing, and mathematics-education policy for the State of Israel. She received her Ph.D. from the Department of Mathematics and Computer Sciences at Ben-Gurion University and her B.Sc. and M.Sc. from Technion, the Israel Institute of Technology. Directing research and development projects aimed at promoting excellence, creativity, and equity, she heads the 13-year “Kidumatica Project,” which cultivates talents and giftedness among students of diverse backgrounds.

Jeff Babb (M.Sc.) joined the Department of Mathematics and Statistics at The University of Winnipeg in 2000 and served as Chair from 2004 to 2009. Before this, he was Principal Consultant for the Statistical Advisory Service at the University of Manitoba for 12 years and biometrician for the Grain Research Laboratory of the Canadian Grain Commission for 16 years. He has extensive statistical consulting experience with industry, government, and academia in the planning, design, implementation, analysis, and reporting of scientific research projects. Having collaborated with researchers in many fields, he has published in a wide variety of scientific and educational journals, with 15 peer-reviewed journal articles and four peer-reviewed book chapters as author or co-author.

Charlene J. Barva (Ph.D.), a registered psychologist, is currently employed with the Calgary Board of Education as a specialist in gifted education, in Calgary, Alberta, Canada. She completed her Ph.D. and M.Sc. at the University of Calgary and B.Ed. at the University of Lethbridge. She has a number of publications on achievement and motivation in high-ability women, women’s development and potential, and high-ability women with learning difficulties and has presented her research at various conferences across Canada and the United States. In 2008, she co-authored an article published in the *Mensa Research Journal*.

Gabriel Chavira has pursued undergraduate studies at the Autonomous University of the State of Morelos in Mexico. During this time, he has worked with PAUTA, Mexico’s Adopt a Talent Program, leading educational workshops, as well as having participated in several research projects.

Martina Endepohls-Ulpe (Ph.D.) is a lecturer at the University of Koblenz-Landau in Koblenz, having lately received her postdoctoral lecturer license (PD). She teaches educational psychology and developmental psychology to student teachers and students of pedagogy. In recent years, she has published several articles dealing with the influence of teachers’ abilities and the impact of gender and social behavior on the identification of gifted children.

Gillian Eriksson (Ph.D.) is the Coordinator of the Gifted Education Program at the University of Central Florida. Her doctoral research focused on curriculum, research and evaluation, and special education of the gifted. She co-edited *Diversity in Gifted Education: International Perspectives and Global Issues*. Professionally, she holds the positions of Chairperson of Collaboration in International Research, Communication, and Learning; consultant editor of *Gifted Education International*; member of the editorial board of *Research and Evaluation in Education*; and delegate to The World Council for Gifted and Talented Children for the United States.

Cathrine Froese Klassen (M.A.) began her career as a high-school teacher. Besides holding key leadership roles in provincial curriculum committees and professional associations in the German, English, and Gifted Education disciplines, she was English Department Head at her school and Advanced Placement Coordinator and Coordinator for Gifted and Talented Programming and Critical Thinking in her school division in Winnipeg, Manitoba, Canada. Since 2007, she held the position of Executive Administrator of The World Council for Gifted and Talented Children at its Headquarters at The University of Winnipeg. She has taught courses at both the University of Manitoba and The University of Winnipeg and continues to teach in the Faculty of Education at the latter institution.

Stefanos Gialamas (Ph.D.) is the President of the American Community Schools of Athens. He holds a B.Sc., an M.A., and a Ph.D. in mathematics and has published two books and more than 50 articles in the areas of leadership and mathematics. He has been professor, dean, and provost at universities in the United States and Greece. He is a member of the International Schools Accreditation Committee (ISAC), recommending institutional accreditation to the Middle States Association of Colleges and Schools.

Zenita Cunha Guenther (Ph.D.) is the Director of the Center for Potential and Talent Development in Minas Gerais, Brazil. She has authored 18 books and over 100 articles, published in Brazil and abroad. Her professional activities have included lecturing as a visiting professor at several universities in Brazil and Portugal and working as a consultant to educational organizations. Since her retirement from the Federal University of Minas Gerais, she has pursued her interest in developing human ability and talent. At present, she is a volunteer professor at the University of Lavras.

Carole Ruth Harris (Ed.D.), Director of G.A.T.E.S. Research & Evaluation, holds a doctorate in Gifted Education from Columbia University. Formerly Associate in Education in International Education at Harvard University and researcher on the Hollingsworth Longitu-

dinal Study at Teachers College, Columbia University, she has specialized in education of the gifted, international education, creativity, and qualitative research methods. Her most recent publications include *Fostering Creativity in Children, K – 8: Theory and Practice*, as co-author, and “The Fragility of the Faceted Child: Gifted Culturally Conflicted, Isolated” in *Diversity in Gifted Education: International Perspectives on Global Issues*.

Dieter Hausamann (Ph.D.) is the Head of DLR School Lab Oberpfaffenhofen in Wessling, Germany, operated by the German Aerospace Centre (Deutsches Zentrum für Luft-und Raumfahrt). He holds a doctorate in physics from the University of Freiburg, Germany. His work has resulted in the publication of numerous papers, including “Enrichment at the Doorstep of University - The Einstein GPS Project.”

Miriam Martínez Armenta (M.Sc.) was educated at the National Autonomous University of Mexico, where she completed a B.Sc. and an M.Sc. in biochemical sciences. She has been the recipient of many scholarships, including the Hugo Arechiga Fellowship, the Mexican National Science and Technology Council Master Studies Scholarship, and the Biotechnology Institute-UNAM Bachelor Thesis Scholarship. Currently, she is completing a Ph.D. in biochemical sciences, while being actively engaged in PAUTA Morelos as a workshop leader and coordinator.

Andrea McCluskey is the Coordinator of the Aboriginal Student Services Centre at The University of Winnipeg. A member of the Manitoba Métis Federation, she has worked as a consultant in more than 40 Native communities across Manitoba. Several of the projects she has coordinated—“Second Chance” (to reduce recidivism of Native inmates), “Lost Prizes” (to reclaim talented high-school drop-outs), and “Northern Lights” (to support Aboriginal youth)—have received national and international acclaim. Andrea is co-author of several articles and chapters about these programs and, with her husband, Ken, author of the best-selling book, *Understanding ADHD: Our Personal Journey*.

Ken W. McCluskey (Ph.D.) is Dean and Professor of Education at The University of Winnipeg, Canada and has 25 years of experience as a school psychologist, special educator, and administrator in the public-school system. He is a recipient of the Canadian Council for Exceptional Children's national publications award and The University of Winnipeg's teaching, research, and community service awards. Dr. McCluskey has presented and written extensively on topics such as mentoring, ADHD, gifted education, creativity, and talent development.

Errol Moore (PGDip., Dip.Tchg.), conductor and euphonium performer, both nationally and internationally, has led music education components in the primary teacher training program at the University of Otago College of Education and the Dunedin College of Education in New Zealand since 1989. From 2003 to 2005, he was the designer and director of the Music Heartland Project, a New Zealand Ministry of Education funded initiative fostering the development of musically gifted and talented children. Chair of Music Education New Zealand Aotearoa, he has also co-authored the Chinese and Malaysian stopover classroom resources.

Jack A. Naglieri (Ph.D.) is Professor Emeritus of Psychology at George Mason University since 2000, Research Professor at the University of Virginia, and Senior Research Scientist at the Devereux Center for Resilient Children. Dr. Naglieri obtained his Ph.D. in educational psychology from the University of Georgia and taught school psychology at Northern Arizona University (1979 to 1982), The Ohio State University (1982 to 2000), and George Mason University. He is the author of more than 250 publications and many tests, including the Naglieri Nonverbal Ability Tests (1997, 2008), and co-author of *Helping All Gifted Children Learn*.

Dorit Neria (M.Ed.) studied geology and mineralogy in her undergraduate science program. As a graduate student at Ben-Gurion University of the Negev, she is focusing on the cognitive and affective aspects of mathematically promising students in her current research study. She teaches in the Kidumatika

mathematics club for gifted and talented students at Ben-Gurion University.

Janet Paul de Verjovsky (Ph.D.) is currently the national pedagogical-scientific Coordinator of PAUTA, a pioneering program for the identification and support of scientific talent in Mexico; she is also the pedagogical Coordinator of PAUTA Morelos. In both programs, she has been responsible for the investigative focus. For over 25 years, she was a science teacher at the primary-, secondary-, and high-school level in Mexico, Italy, and France. She has coordinated two Master's programs in teacher training. Previously the deputy-chief examiner in biology in the International Baccalaureate Organization, she continues working in it as a principal examiner.

Christiana Perakis Evloyias (M.A.) completed her graduate studies in special education at Lesley College in Massachusetts, USA. She is a founding member of the Special Education Needs society in Greece and of the Hellenic Institute for Study and Research of Learning Disabilities. At present, she is Chair of the Special Education Needs Committee of The European Council of International Schools. She also serves on two SEN Committees in Greece: The International Baccalaureate Organization and The Stavros Niarchos Foundation. Ms Perakis is pursuing a post-graduate degree on improving student learning and an M.B.A. from the University of Indianapolis.

Eleoussa Polyzoi (Ph.D.) is Professor of Education at The University of Winnipeg, Canada. She has published extensively in the area of evaluation, language development, childcare, and comparative education. Her research on the Eastern Europe education system was co-edited by Michael Fullan and John Anchan. She was director of a major CIDA project: Russian Teacher Training for At-Risk Students, a joint initiative of The University of Winnipeg and the Russian Academy for Advanced Professional Standards and In-Service Teacher Training. Her current research involves an examination of respiratory health, housing conditions, and school absenteeism, conducted by a team of researchers from the universities of Winnipeg, Manitoba and Harvard University.

Joseph Renzulli (Ph.D.) received his doctoral degree from the University of Virginia and is Director of the National Research Center on the Gifted and Talented at the University of Connecticut. In 2009, he was the recipient of the Harold W. McGraw, Jr. Prize in Education for his innovative work in applying gifted education pedagogy to the improvement of learning for all students, embodied in the Renzulli Learning System. RLS—an online, personalized learning program—generates an individual, strength-based profile for each student, and a search engine then matches multiply tagged, high-engagement resources to the individual student's profile.

Yoloxochitl Sánchez-Guevara (M.A.) completed her graduate studies in biochemistry at the National Autonomous University of Mexico (UNAM). A high-school biology teacher, she has coordinated science workshops at the Autonomous University of the State of Morelos (UAEM). At present, she is working on a project for the Developmental Genetics and Molecular Physiology Department at UNAM and as a workshop facilitator for the Adopt a Talent Program (PAUTA). She has participated in 14 academic conferences, nationally and internationally.

Leobardo Serrano-Carreón (Ph.D.) completed a doctorate in biotechnology at the University of Bourgogne in France. He has conducted post-doctoral work at the University of Birmingham and at Cornell University and has gained recognized expertise in bioprocess engineering for mycelial cultures in the pro-

duction of antibiotics and biological control agents based on fungal and bacterial antagonists. He has published 32 international, refereed papers and one book chapter. Since 2008, he has participated in PAUTA as Morelos State Coordinator.

June Slee (Ph.D.) is a Senior Lecturer in the School of Education at Charles Darwin University in the Northern Territory of Australia, teaching behavior and inclusive practices to post-graduate, pre-service educators. Her research is mainly directed at Indigenous teaching and learning. She has worked extensively with gifted and talented students in inclusive classrooms, supporting the teacher in the realization of the students' potential, particularly in the domain of social competence. Her book on marginalized youth has been accepted for publication in July 2011.

Julia Tagüeña (Ph.D.) completed a doctorate in physics at Oxford University. A professor of physics, she is also researcher and lecturer at the Energy Research Center at the National Autonomous University of Mexico (UNAM) and part of the Mexican National System of Researchers, at the highest level. Her latest paper on photonic crystals was published in *Optics Express*. She is the author of five high-school physics books. The former Director of Universum, the Interactive Science Museum of UNAM, she is now president of the Science Communication Mexican Society, (*Sociedad Mexicana para la Divulgación de la Ciencia y la Técnica*).
